

## What is an ecosystem team?

The ecosystem team is the group of member-representatives of all your participating library-related groups. This team can be as small as 2-3, if you only have that many organizations, or as large as you need. Each ecosystem t

Town councilors  
County commissioners  
School and college administrators  
Community and business leaders  
School board members, local or state  
Library school instructors

How does ecosystem work differ from the work of advocacy teams for each library organization?

The work of the ecosystem group will enhance and strengthen the advocacy of individual groups in the state, as well as increase collaboration among groups around a common purpose. Every group can continue their advocacy agendas at the same time as they participate in the collaborative y of
